PRESS RELEASE

RBI selects Sernova Financial's ETD clearing solution and goes live on time and within budget.

Raiffeisen Bank International ("RBI") has successfully implemented Sernova Financial's exchange-traded derivatives clearing solution, enhancing RBI's capacity to clear ETD transactions while delivering significant operational and cost efficiencies for clients globally. One year after selection, the solution went live on time and within budget.

Sernova's managed post-trade middle and back-office service, supported by 24-hour operational coverage, enables RBI clients to clear through 45 ETD exchanges, improving delivery timelines and enhancing the reporting experience.

Sernova's expertise and technology are helping RBI's Group Prime Services division strengthen risk management, improve transparency, support regulatory compliance and streamline ETD operations. The solution provides a more seamless, secure and scalable clearing environment for institutional clients.

CLIENT COMMENT

"Our clients expect the best clearing solutions, and Sernova provides this. Together we are strengthening our clearing capabilities and enhancing the user experience for our clients. With improved STP rates and operational cost savings, we are confident that our partnership will continue to bring long-term value and growth to RBI and our clients."

Christian Geberth
Division Head Group Prime Services
Raiffeisen Bank International

SERNOVA COMMENT

"We are delighted to partner with RBI and provide them with our leading ETD clearing solution. Our unique approach enables banks, brokers, hedge funds and proprietary trading firms to specialise, scale and streamline clearing for multiple asset classes across markets, delivering faster implementation and significant cost savings."

Steve Luxton
Head of Product and Operations
